SCOPING
**MACHINE
LEARNING**
PROJECTS

01
What is the problem
worth solving?

02
How do humans solve
the problem?

03
What data is available
for training?

04
What system performance
is expected?

05
What is the scenario
of use in production?

**Business
view**

**Technical
view**

**Final
evaluation**

Is it likely to get to a reasonable business case with ML here?
